

## Report on Monsoon Mela

A one-day Monsoon Mela was a student-led activity organized on 28<sup>th</sup> July 2016, by the Department of Human Development wherein students were guided by staff to put up the entire event. Apart from raising funds, one of the most important objectives was to provide an experience of event management to the students of the department. Here, in the process of planning for and executing the event, the students learnt a lot of skills like event management, accounts management, group cohesion, problem solving, creativity, leadership, frustration tolerance, patience etc. It was a recreational/fun event open for all students and staff of the college which would also help students at younger levels know more about the department. The stalls included food stalls, game stalls, hair and make over, accessory sale stalls, as well as a garage sale, a photo booth with creative props for selfies, a music request stall, and affirmation card readings. Students of the department and others in the college had an engaging fun-filled experience.
